*Materials Used: paper bags,  
plastic sheets, twigs and twine.*

*Yard waste makes up a significant percentage of the total waste stream. Using yard waste collection service saves a considerable amount of landfill space across the country. There is another reason to recycle your yard waste. Strange as it seems, these materials can do real environmental harm if they end up in a landfill. But they can do our planet a world of good if they are recycled.*

*Materials Used: ceramic pot pieces, textile,

wood and styrofoam*

*Styrofoam takes an estimated 500 years to decompose, and fills up 25-30% of landfill space around the world. It is best to avoid its use. If you have to use it, Foam Products Corp will take packaging materials for recycling - no used food or drink containers will be accepted. [www.fpcfoam.com](http://www.fpcfoam.com)*
